

Are you ready for some data?

Employee data that is! Last year Metro Rideshare introduced the new ETC Portal for the Ridematch.info website. What that means is you, the ETC, now have access to your employee survey data all year long.

The NEW Ridematch.info Training for ETCs will help you learn how to access and use that data collected from your annual employee survey. Discover how to run a variety of employee commute trip reports and density maps. Determine how to identify what commute alternatives may be most effective to promote at your worksite, strategies to help employees with their commute options and ridematching. Explore your options for using the Commute Calendar to track your employee's trips for internal and external incentive programs and Metro Rewards.

To reserve your space, please email rideshare@metro.net and include the Ridematch.info Training date, ETC name, company name, telephone number. This training session is available to employers and ETCs at no cost.

All **trainings** are held at Metro Headquarters located at One Gateway Plaza, Los Angeles, CA 90012 on the following dates:
