# Regional Airport – Rail Connectivity: Airports under Study

# Overview of Regional Airport – Rail Connectivity (Metro Board Motion 80, July 2012)

Motion 80 requests the following:

- Implementation Plan for rail connections to the 5 airports
- Review and analysis of current transit options
- Input from FAA and SCAG on potential funding and support
- Report on expediting the LAX airport connector to open concurrent with the new Crenshaw/LAX project
- Overview of coordination and funding required from partner agencies

SCAG has compiled useful information on airport transit connections in its 2012 Regional Transportation Plan (RTP). We will work closely with SCAG going forward.
