

Metro

Union Station *Master Plan* | Committee Meeting

October 16, 2013

Transport Optimization

- Create large multi-modal concourse
- Relocate Patsaouras Bus Plaza and co-locate bus operations
- Plan for integration of high-speed rail

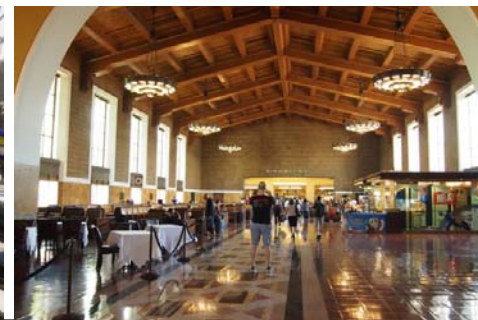

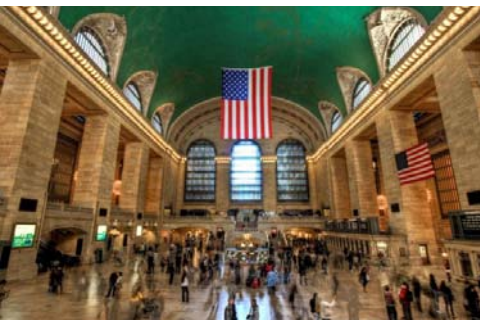

Transport Improvements are the foundational building blocks for achieving the master plan goals

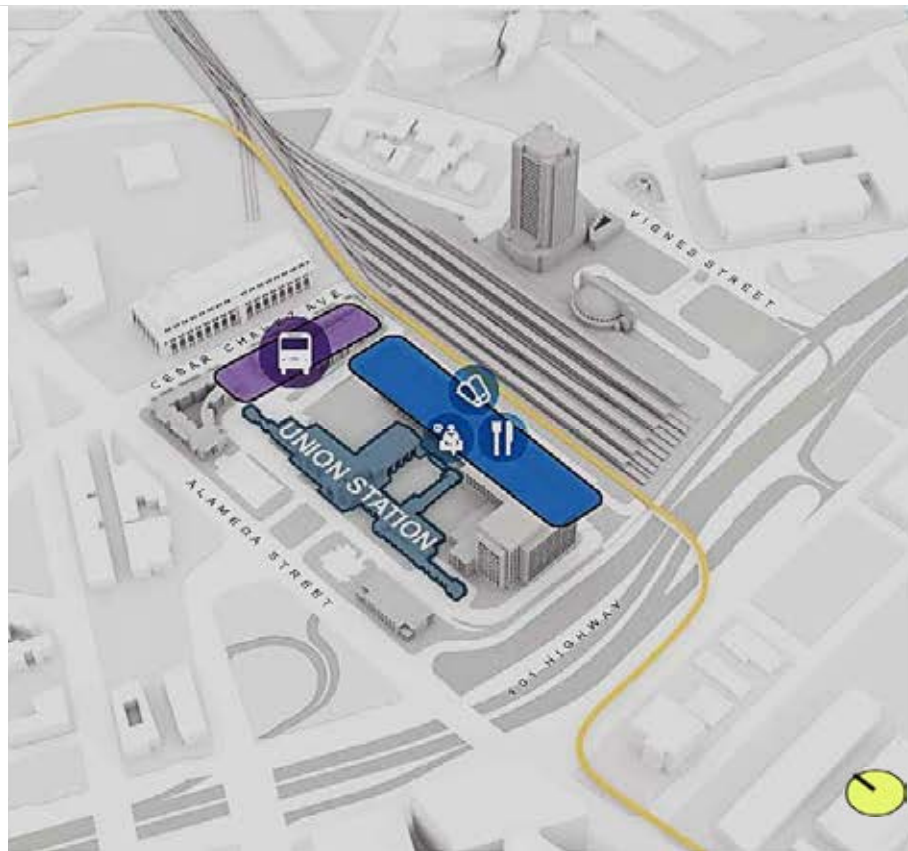

Destination

- Reinvigorate historic station and courtyards
- Provide uses that support transit functions

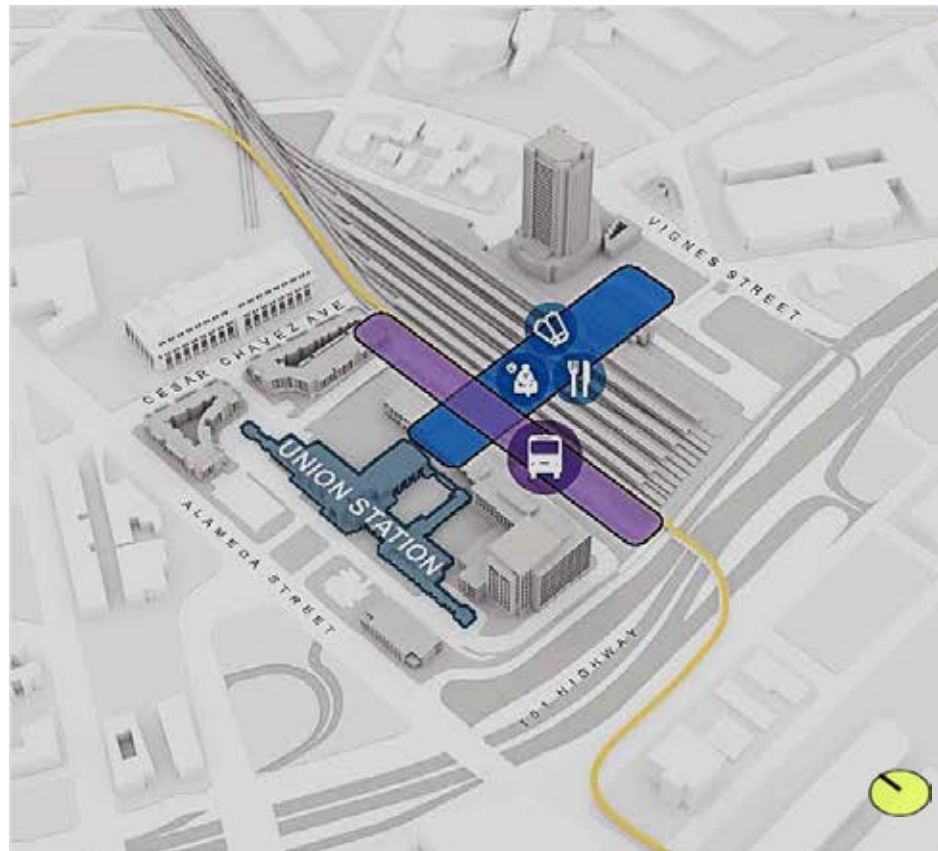

Connectivity

- Reinforce neighborhood connections
- Create clear pedestrian and bicycle routes through the site

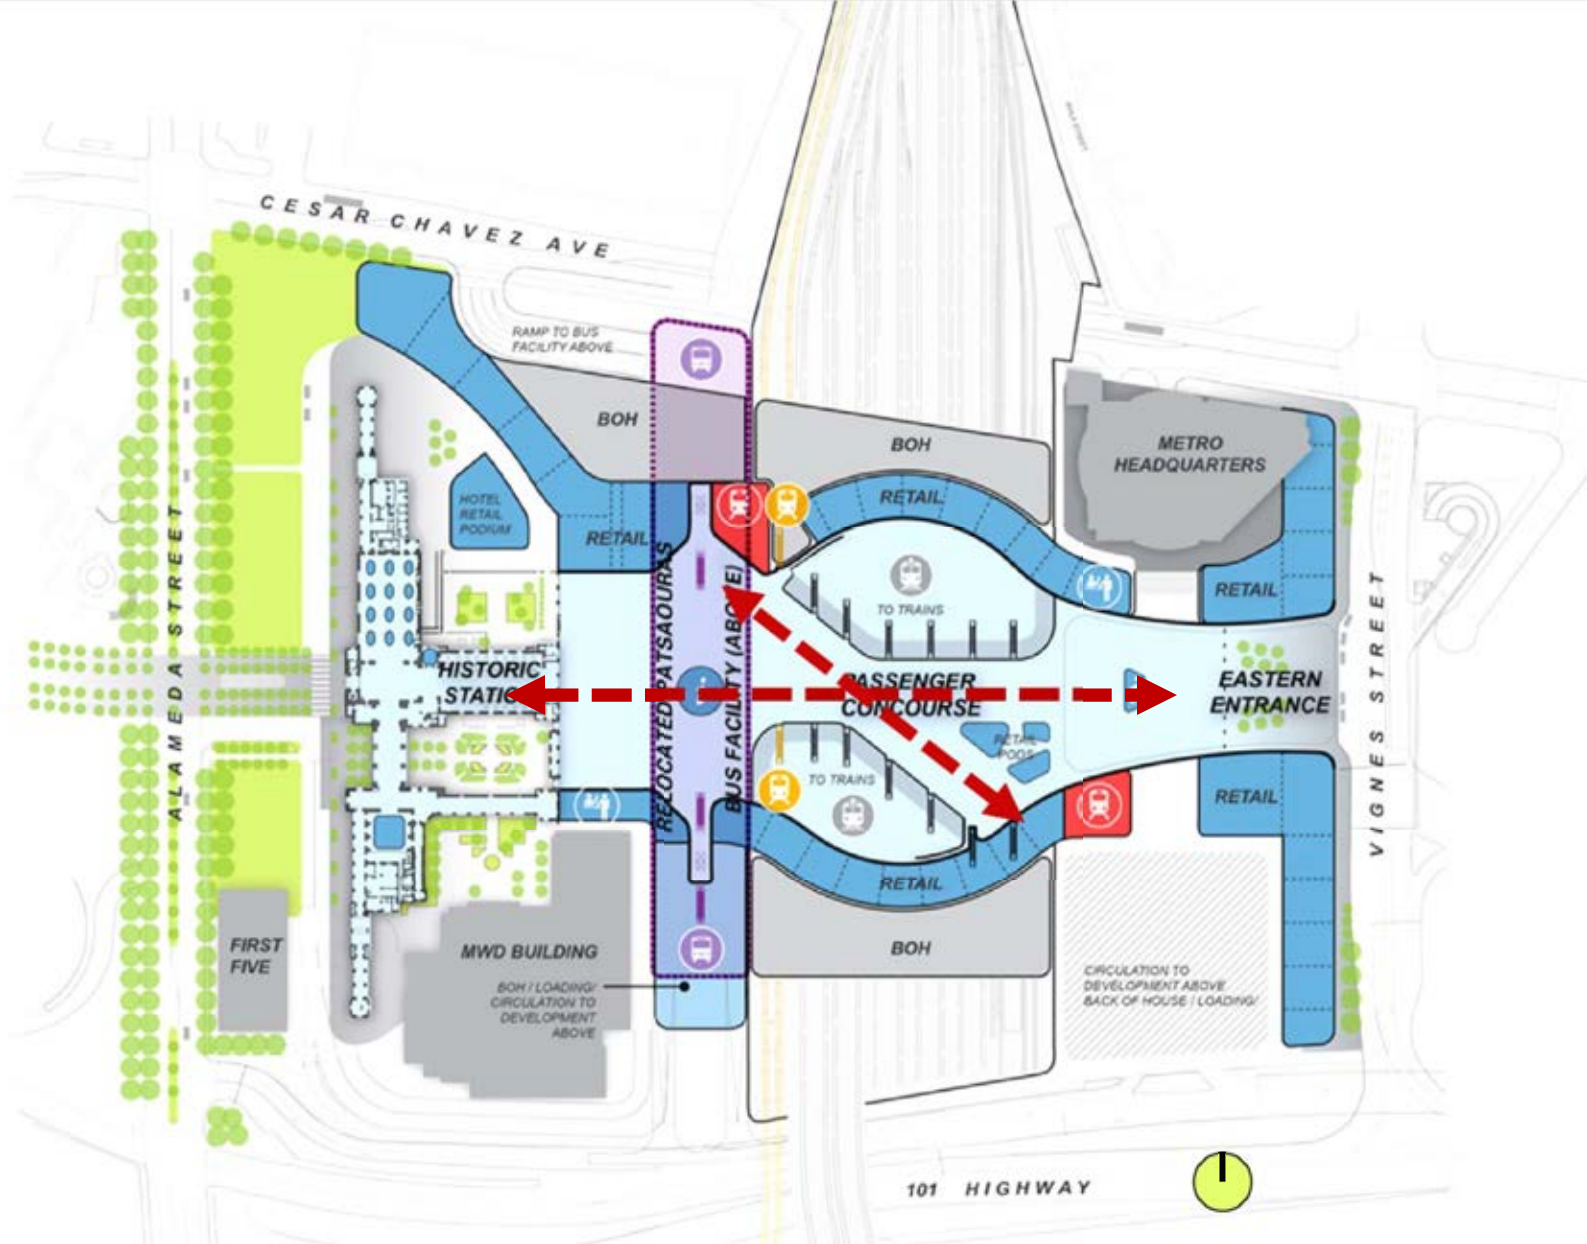

N/S Passenger Concourse +
E/W Relocated Patsaouras Bus Facility

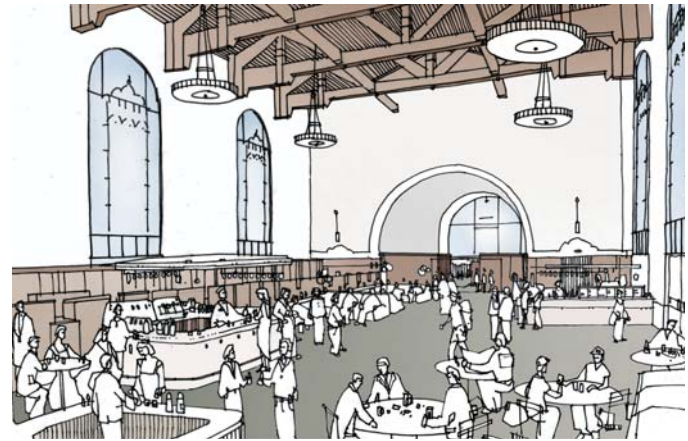

E/W Passenger Concourse +
N/S Relocated Patsaouras Bus Facility -
RECOMMENDED

Key Benefits to Recommended Approach

- Adequate space for passenger circulation now and in future
- Great connection between east and west sides of site, tying the site together
- Creates spaces to offer amenities to transit riders and to attract other users
- Relocated Patsaouras Bus Plaza will enhance passenger safety and bus operations
- Station is positioned to be transformed into a destination and transit functionality is optimized

Metro

Recommended Approach

Next Steps

- Recommended approach will be further developed in Task III
- Team will develop phasing plans, detailed cost estimates, financing approaches, governance structures
- We will check in with Board in early spring 2014
- We will come back to Board with Final Plan in early summer 2014
