

## DUBOIS MOTION

### Item 55

### Executive Management Committee

**November 21, 2013**

There is a lack of Active Transportation goals within both the state and federal legislative programs/plans. There is only a brief mention of MTA's bike program as part of a federal goal, but other than that, it appears that all funding for active transportation projects is supposed to be fully met locally.

I, THEREFORE, MOVE that the MTA support the inclusion of Active Transportation components in eligibility for transit and highway funding at both the state and federal levels.
