# Environmental Status Report

presented to the

## Technical Advisory Committee

January 19, 2011

# Environmental Studies and EIR/EIS Update

- Environmental work has generally been on hold pending MTA approval of scope modifications
- Currently updating alternatives description that will be used in the technical studies and EIR/EIS

# 2011 Look Ahead

- Initiate technical study revisions following completion of updated traffic and engineering work
- I-710 Funding Partner review of revised studies
- Complete final technical studies
- Present “Executive Summary” and focused study results to TAC, CAC, and other committees
- Integrate final technical study results into Draft EIR/EIS
- I-710 Funding Partner review leading to Caltrans’ approval to circulate Draft EIR/EIS for public review
