

Division 20 Portal Widening & Turnback Facility

Project Descriptions

- Widen the tunnel portal that currently connects the Metro Red and Purple Lines to the Rail Yard, including construction of a new ventilation shaft building.
- Construct new storage tracks.
- Reconfigure existing tracks and access roads to accommodate a turnback facility.
- Install a new traction power substation and emergency backup power generator.
- Expand the Rail Yard west, into areas currently occupied by the Citizens Warehouse/Lysle Storage Company Building, the LAPD Viertel's Central Division Police Garage, and the National Cold Storage facility.
- Repurpose an existing building at 100-120 North Santa Fe Av for maintenance of way activities.
- Modify the 1st Street Bridge piers and superstructure.
- Vacate portions of three City streets (i.e., Jackson, Banning, and Ducommun Sts east of Center St).

- Existing Metro Rail & Station
- Metro Silver Line & Station
- Regional Connector & Station (under construction)
- Amtrak/MetroLink
- Metro Property/Right-of-Way
- Proposed Turnback Tracks Area
- Proposed Storage Tracks Area
- Proposed Portal Widening Area
- Proposed Maintenance-of-Way (MOW) Relocation
