## CONCRETE PANEL DECKING OPERATION ON 1<sup>ST</sup> STREET BETWEEN BODIE AND BAILEY

The Contractor for Metro will begin the street decking operation on 1<sup>st</sup> Street between Bodie and Bailey. Over the past weeks, the Contractor has been installing piles in this area, which form the sides of the station to be excavated below 1<sup>st</sup> Street. The next operation, which forms the subject of this notice, will involve the construction of a deck spanning between the piles over which the traffic can travel, while the station is excavated underneath. This will entail excavating the full width of 1<sup>st</sup> Street to install deck beams between the piles, which will support the concrete deck panels. Once the concrete decking has been installed, traffic will resume to normal conditions

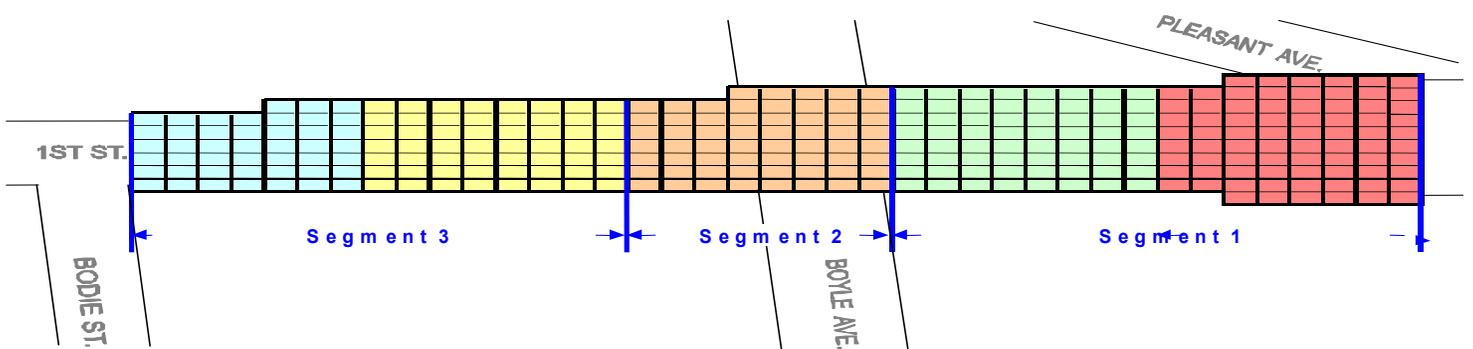

**What:** Street Decking Operation

**When:** This activity will be carried out at weekends to minimize the impact on traffic using 1st and Boyle streets, beginning the weekend of March 4, 2005. Work hours will be continuous from Friday, 6:00pm through until Monday, 6:00am.

**Where:** 1<sup>st</sup> Street between Bodie and Bailey. The work will be carried out in three principal segments and 1st Street will be closed at any weekend in one of those three segments: east of Boyle, between Boyle and Bailey; at Boyle itself; or west of Boyle, between Boyle and Bodie.

**What to Expect:**

As indicated in the picture below, the street will be closed in the segment area where the work is being performed. The work will commence with the excavation of the street using hydraulic excavators and haulage trucks. The beams, which form the supports to the decking, will then be lowered into position over the piles using a large crane and welded together. The same crane will then place concrete panels on top of the beams to form a deck. This deck will become the road surface of 1st Street. Upon completion of work in any particular area, that segment of 1st Street will be re-opened to traffic at 6.00 am, Monday morning. This process will be repeated each weekend working from east to west until the work is completed. The Department of Transportation approved traffic control plan will allow for north-south traffic to continue on Boyle and the perimeter streets with the exception of the segment 2 at Boyle. Detour signage will be installed to clearly divert the traffic in the area during this work, and Traffic Control Officers will be on duty. Pedestrian access to homes and businesses will be maintained at all times.

Remember to always be car walking through or near a c  
*Thank you for your patience*
