Alternative A – Widen Existing Ramps
Alternative B – Realign Ramps East, Remove Flyover & Part of Overpass
Alternative C – Realign Ramps East, Remove Flyover & Overpass
**SR-2 Freeway Terminus Improvement Project**

**Alternative D – Realign Ramps East, Retain Flyover & Overpass**

The diagram illustrates the planned improvements for Alternative D, which involves realigning ramps east, retaining flyovers, and overpasses. Key features include:

- Possible linkages to Los Angeles River
- Landscape buffering
- Maintenance access
- Existing traffic signals at Glendale Blvd and Farnia Street
- Enhanced intersection crosswalks
- Street trees

**Key Features**
- Glendale Blvd: Overcrossing retained
- Flyover structure from SR-2: modified and reused
- Accessible ramp located adjacent to existing flyover
- Street improvements at Glendale and Farnia Sts
- Existing traffic signals at SR-2
- Pedestrian connectivity enhanced by adding crosswalks and island

The project aims to improve safety and accessibility while maintaining the aesthetic and functional aspects of the area.
