What is decking?
The Purple Line Extension Transit Project has been engaged in construction activities along Wilshire Bl and La Cienega Bl since June 2014. Work began with advanced utility relocation (AUR), followed by major subway construction in March 2017 with pile installation. The underground piles will provide structural support for the excavation of the subway station box at Wilshire/ La Cienega.

Now complete, Phase 1 closed Wilshire Bl for two weekends, between San Vicente Bl and La Cienega Bl, to support piling operations. The next step after piling is decking.

Decking is a construction process that entails excavating the street and sidewalks, and replacing them with temporary concrete deck panels on top. This will allow traffic to continue to flow, while maintaining access to sidewalks and driveways as construction continues underground.

Where will decking occur?
In the Wilshire/La Cienega area, decking will occur on Wilshire Bl between San Vicente Bl and mid-way into the Wilshire Bl/La Cienega Bl intersection. Decking will also take place inside the Wilshire/La Cienega staging yard. The work on Wilshire Bl – excavating and placing steel beams and deck panels across the street – will occur over fifteen weekends starting in October 2017.

To complete decking for Phases 2 and 3, four full weekend closures are anticipated for the Wilshire Bl/ La Cienega Bl intersection, and eleven full weekend closures are anticipated for Wilshire Bl between San Vicente Bl and La Cienega Bl. Sidewalk access will be maintained; however, some intermittent closures may occur depending on the nature of the work. Access to buildings and businesses within the work zone will be maintained.

**TYPICAL WEEKEND SCHEDULE**
**OCTOBER 2017 – EARLY 2018**

**Fridays**
- Phase 2: Full closure of Wilshire Bl at La Cienega Bl
- Phase 3: Full closure of Wilshire Bl between San Vicente Bl and La Cienega Bl
