

Crenshaw/LAX Transit Project

Overview Fact Sheet

Metro

Overview

Metro's Crenshaw/LAX Transit Project will extend light rail transit service from the existing Metro E Line (Expo) at Crenshaw and Exposition Boulevards in Los Angeles, and merge with Metro C Line (Green) at the Aviation/LAX Station on Aviation Boulevard and Interstate 105 in the City of El Segundo. The line will travel 8.5 miles and serve the cities of Los Angeles, Inglewood and El Segundo.

Once in operation, this line will offer additional transportation options to congested roadways and provide significant environmental benefits, economic development and employment opportunities throughout LA County. Riders will have easier connections within the Metro Rail system, municipal bus lines and other regional transportation services. The project includes the Southwestern Yard Maintenance Facility, a facility with the capacity to service and store up to 70 light-rail vehicles (LRV). The facility will serve the new Crenshaw/LAX Project and the existing Metro C Line (Green), housing general administration, operation and support services. The facility will be equipped to perform inspections, body and heavy repairs, and cleaning and washing of Metro's growing LRV fleet.

Project at a Glance

- > A new 8.5-mile light rail line from the Metro E Line (Expo) at Crenshaw and Exposition Boulevards to the Metro C Line (Green) near Interstate 105
- > Southwestern Yard Maintenance Facility near Los Angeles International Airport (LAX), completed in Spring 2019
- > Eight new stations: Expo/Crenshaw, Martin Luther King Jr, Leimert Park, Hyde Park, Fairview Heights, Downtown Inglewood, Westchester/Veterans and Aviation/Century
- > New Park & Ride lot at Fairview Heights Station
- > Life-of-project budget: \$2.148 Billion
- > Anticipated completion: Winter 2020/2021 followed by train testing and operator training

Connection to LAX Automated People Mover

Metro is constructing a transit station that will connect LAX to the regional rail system. The Airport Metro Connector (AMC) transit station at Aviation Bl and 96th St will provide a direct connection to LAX's future Automated People Mover (APM).

Joint Development

To further its mission of promoting transit-oriented communities, Metro Joint Development collaborates with qualified developers to build transit-oriented developments on Metro-owned properties. Joint Development sites are a gateway to the Metro transit system and hold unique potential to advance community development goals, while attracting new transit riders. Metro is currently pursuing joint development adjacent to the Crenshaw/LAX Transit Project's Expo/Crenshaw Station.
