INCLUDING SEXUAL HARASSMENT RESPONSES****ACTION: RECEIVE AND FILE****RECOMMENDATION**

Receive and file report on latest on-board customer satisfaction survey results, including sexual harassment responses

ISSUE

This report presents the Metro On-Board Customer Satisfaction Survey (Customer Satisfaction Survey) results from 2014. We continually strive to increase our data collection and reflect the community of which we are a part. We added a question about harassment in the Winter 2013 survey, at the direction of the CEO, to try to better understand the issue; to augment currently available enforcement data; and to be able to take steps for education and/or prevention if necessary. The Spring 2014 survey is the second time we have asked a question on this subject.

Metro is one of only a handful of transit agencies in the world that regularly asks a question about experiences of sexual harassment. Others include Boston, Atlanta, London and Paris.

DISCUSSION

The Customer Satisfaction Survey has been fielded for over twelve years. It contains a regular battery of questions designed to obtain passenger perceptions of Metro transit performance such as operator courtesy, on-time performance, overall cleanliness, and delivery of Metro information. It also contains demographic information used by several departments as required by federal law and for internal analysis.

Currently the survey is fielded twice each year on bus and rail lines making up over 98% of the average weekday boardings on the Metro system. A total of 22,604 completed surveys were returned, of which 7,586 (34%) were in Spanish.

The Results

The results of the survey indicate that passengers overwhelmingly have positive responses to Metro:

- 86% of passengers are generally satisfied
- 79% feel their bus/train is generally on time
- 83% feel safe waiting for their bus or train

The question on sexual harassment was re-worded to make it consistent with the question similar surveys ask and to make the results comparable to law enforcement data. While the previous question was about perception, this question is about experience. Also, the timing was lengthened from one month to six months.

Twenty two percent of respondents indicated that in the last six months, while riding on Metro, they had experienced unwanted sexual behavior including, but not limited to: touching, exposure or inappropriate comments. There was no delineation between the three aspects of harassment, but law enforcement data would suggest that the highest experience was associated with inappropriate comments.

Staff looked at statistics from both the LASD and Metro Customer Relations. For the calendar year 2014, with about 450 million boardings in Metro's transit system, there were 37 customer complaints filed with Metro that met the criterion of sexual harassment. There were 99 LASD reports related to sexual harassment with the bulk of them being touching (62) and indecent exposure (31). There were 20 arrests made from these LASD reports.

While having 22% of the Metro survey respondents reporting experiencing some form of unwanted sexual behavior is cause for concern, to have on any system, it is clearly a worldwide societal problem, and not just on transit but in public places in general.

- In New York, 63% of subway riders reported being sexually harassed, and more than 90% of victims said they did not report it.
- In London, England, 31% of women aged 18-24 reported experiencing unwanted sexual attention on transit.
- In Beijing, China, a 2002 survey reported 70% of females exposed to some form of sexual harassment, most occurring on public transportation.
- In Japan, 66% of women, aged 20-39, say they have been molested on Tokyo commuter trains.
- A 2000 telephone poll found that 87% of women in the US between the ages of 18-64 have been harassed by a male stranger in a public place.
- In India, 95% of women surveyed said their mobility is restricted because of fear of male harassment in public places.

Metro takes seriously our commitment to provide safe transit to our customers and values their responses to the survey. The data collected helps us address the issues and ensure the safety of all Metro riders.

DETERMINATION OF SAFETY IMPACT

The data collected helps us address the issues and ensure the safety of all Metro riders.

FINANCIAL IMPACT

There is no financial impact to receiving and filing this report

ALTERNATIVES CONSIDERED

The board could choose not to receive and file this report, but that course of action is not recommended as this data collection is part of an action plan that will inform outreach, education and public information aimed at making the system safer and more secure.

NEXT STEPS

Currently, Metro is working with the advocacy group Peace Over Violence to develop a strong campaign to stop sexual harassment and empower potential victims. We will launch the campaign to coincide with National Sexual Harassment Awareness Month in April.

Our campaign speaks to our riders on three themes:

- Sexual harassment is a testing ground. People who start out with inappropriate remarks or touching are just testing to see how far they can go. If unchecked, the harassment can ramp up to stalking, assault and even rape.
- People don't have to tolerate it. Many incidents go unreported because the victim mistakenly thinks nobody cares and nothing will be done. We encourage passengers to report any incident of sexual harassment.
- Keep yourself safe. Sexual harassment can happen to women and men, girls and boys. We can keep ourselves and other safe by reporting sexual harassment.

We will continue to monitor the levels of harassment through our research program which includes the semi-annual Customer Satisfaction Survey.
