Station Benefits/Features

Construction on the new Burbank Airport – North Metrolink Station continues on schedule, with construction targeted for completion in May 2018 and passenger service estimated to start in June 2018. The new Metrolink station will offer commuters a “Train to Plane” connection between Hollywood Burbank Airport and the communities of San Fernando Valley, Santa Clarita Valley, and Antelope Valley.

The station will be located at the northwest corner of Hollywood Way and San Fernando Rd/Bi in the cities of Los Angeles and Burbank, and approximately one mile from the current Hollywood Burbank Airport terminal. Additionally, the new station will be within walking distance to the future Hollywood Burbank Airport terminal and proposed mixed-use development. The new station will feature a new platform, a kiss-and-ride and bus drop-off areas, information phone, pedestrian sidewalk, canopy, ticket vending kiosk, safety railings and lighting, signage, seating, bike racks as well as other public amenities.

Project Schedule

- **Construction start:** March 2017
- **Construction complete:** May 2018
- **Revenue operation:** June 2018 or sooner

Station Amenities

1. Canopy
2. Ticket Vending Machine
3. Train Schedule LED Panel
4. Benches
5. Trash Receptacles

Train to Plane Connection – Coming Soon to the Metrolink Antelope Valley Line!

The new Metrolink station will offer commuters a “Train to Plane” connection between Hollywood Burbank Airport and the communities of San Fernando Valley, Santa Clarita Valley, and Antelope Valley. The new station will be located near the intersection of Hollywood Way and San Fernando Road, near the preferred site of the Airport’s replacement passenger terminal, and will serve Metrolink’s Antelope Valley Line (AVL).

In addition, the Burbank-Glendale-Pasadena Airport Authority plans to operate a free shuttle service between the new Metrolink station and the current passenger terminal. The new station will be serviced by the Metrolink AVL, adding another connection to the Hollywood Burbank Airport, in addition to the existing Burbank Airport Station on the south side of the airport, which provides access to the Metrolink Ventura County Line and Amtrak.

The pre-construction conditions of the project area.
Community Meeting Held on March 13

Prior to the start of construction, Metro hosted a Construction Kick-Off Meeting on March 13, 2017 at the Buena Vista Branch Library in Burbank. The meeting offered participants an opportunity to learn more about the new station, and the anticipated construction activities and timeline. In addition, a presentation was made by project team members who were available to answer questions from the audience. Caltrans, Metrolink and the Burbank-Glendale-Pasadena Airport Authority staff were also in attendance to answer questions and listen to concerns.

You were not able to attend?

No problem, the meeting was recorded and can be viewed at: www.ustream.tv/recorded/100972967.

All meeting materials and video recordings of the webcast and Virtual Open House are available in on the project website. You can also use the links below to directly access any of the materials and click on the video image to watch the video recording of the webcast.

What to Expect During Construction

The station is being constructed within the existing railroad right-of-way with minimal impact on Metrolink operations during construction. To enhance safety and enable construction activities, a full-lane closure of San Fernando Boulevard between west of North Hollywood Way and Greg Avenue has been in place.

Construction activities can be expected Monday through Friday between the hours of 6am to 3:30pm; nighttime construction may also occur between 10:30pm to 6am, only if needed. Construction schedule is subject to change based on needs, weather and other operational factors.

The contractor will limit heavy equipment use during nighttime hours to mitigate noise. Provisions are in place to minimize impacts to airport, emergency responder and business access. Efforts will be made to minimize dust and other construction impacts to the fullest extent possible.

Safety is Priority One

Safety in and around the construction zone is key for Metro. Please remember to:
1. Watch for reduced speed limits
2. Watch for construction crew and equipment
3. Allow extra travel time
4. Be attentive when driving at night and in the rain
5. Avoid use of mobile devices or other distractions
6. Watch for lane closures and detours
7. Remember that fines are doubled in construction zone

Next Steps

1. Construction of drainage and irrigation systems
2. Laying of conduit for electrical systems
3. Construction of bus drop-off and kiss-and-ride areas
4. Construction of block walls and planter boxes
